EMERGENCY FIRE ESCAPE SECURITY SCREENS

INVISI-SCAPE

*"Keep intruders out without locking yourself in!"*

## Invisi-Scape Opening Systems

We are always looking at how we can improve our existing products and also design new systems for the ever-evolving marketplace.

Our design team have re-engineered our existing Invisi-Scape system to give you an outward opening escape that is more robust, improves security and is BAL-40 compliant.

Keep your home fire smart with our new and improved Invisi-Scape Opening system with features such as:

### NEW INTERNAL SASH HANDLE

The integrated internal sash handle gives consistent clean lines around the internal sash frame. Its increased rigidity helps to reduce any flex when closing large screens.

### NEW HOLLOW PERIMETER FRAME

The new Invisi-Escape perimeter frame has been developed to increase strength, reduce fabrication time and improve the frame aesthetic. By locating the screw flute into the hollow perimeter frame, fixings have now been concealed improving both the system's security and high end finish.

### NEW FLAT FACED SASH

With its smooth external face and reduced frame width, the new Invisi-Scape sash now allows for an increased open mesh area that provides not only greater visibility and increased air flow but also gives your home a more modern and contemporary appearance.

We've reduced the clearance between the sash and the perimeter frame to minimise any possibility of a pinch point for fingers and added bulb seals to removes noise from any screen movement under extreme weather conditions when the screen latch is closed.

## New Screen Release Lever

The new quick and easy "Press to Release" mechanism allows you to get out quickly in the event of an emergency. Simply press the lever to unlock and push open the screen in one smooth and easy motion. The handle now releases the screen after only 20° of movement, aiding in a speedy escape when required.

*Invisi-Scape easily opens outwards to allow for a quick escape in an emergency.*

## BAL Rated

Invisi-Scape® is BAL rated to protect your home against bushfires in areas from BAL-LOW up to and including BAL-40.

## INVISI-MAXX

MAXX SECURITY. MAXX PROTECTION

Upgrade to Invisi-Maxx for ultimate cyclonic protection.

For protection against cyclonic debris and ultra security protection from intruders, Invisi-Maxx® Escape is the ideal solution.
