# Emergency Escape Security Screens

Invisi-Scape® Emergency Escape Security Screens offer a simple keyless escape method in the event of a fire or an emergency situation.

The need to escape through a window is one that we hope you will never require, however with the Invisi-Scape® System you have confidence in not only additional security but also the peace of mind of egress in an emergency.

## Screen Releaser Lever

The quick and easy “Press to Release” mechanism allows you to get out quickly in the event of an emergency.

Simply press the lever to unlock and push open the screen in one smooth and easy motion.

The handle releases the screen after only 20° of movement, aiding in a speedy escape when required.

## Internal Sash Handle

The integrated internal sash handle gives consistent clean lines around the internal sash frame. Its increased rigidity helps to reduce any flex when closing large screens.

## Hollow Perimeter Frame

The Invisi-Scape perimeter frame has been developed to increase strength, reduce fabrication time and improve the frame aesthetic.

By locating the screw flute into the hollow perimeter frame, fixings have now been concealed improving both the system’s security and high end finish.

## Flat Faced Sash

With its smooth external face and reduced frame width, the Invisi-Scape sash now allows for an increased open mesh area that provides not only greater visibility and increased air flow but also gives your home a more modern and contemporary appearance.

We’ve reduced the clearance between the sash and the perimeter frame to minimise any possibility of a pinch point for fingers and added bulb seals to remove noise from any screen movement under extreme weather conditions when the screen latch is closed.

## Configurations

Choose from a number of sliding or hinged configurations depending on the window opening application.

Side Hinged

Top Hinged

Sliding

## Hinged Screen for Easy Cleaning

The Invisi-Scape Screen also doubles as a hinged screen for ease of opening and cleaning.

The screens are available as inward or outward opening and either top or side hinged, depending on the window type and opening size.

## BAL Rated

Invisi-Scape® is BAL rated to protect your home against bushfires in areas from BAL-LOW up to and including BAL-40.
